DETAILED ACTION

1. Applicant's election without traverse of species II in the reply filed on 8/8/05 is acknowledged. The following is a detailed Office action of the elected species, i.e., claims 1, 3-4 and 8-14.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-4 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 4,823,092, issued to Pennock.

As per claim 1, Pennock discloses a continuous-time active complex bandpass filter (figure 19), comprising:

a filter (column 9, lines 47-49) having a transfer function generated using only a plurality of transconductors and capacitors (the filter shown in figure 19 uses only transconductors and capacitors).

As per claim 3, the recited limitation is disclosed in column 9, line 47, i.e., filters with transmission zeros.

Art Unit: 2816

As per claim 4, the recited limitation is shown in figures 6A and 6B, and described in column 8, lines 14-24.

As per claim 8, the recited limitation is disclosed in column 1, lines 39-43.

3. Claims 1, 3-4 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 5,440,264, issued to Sevenhans et al.

As per claim 1, Sevenhans discloses a continuous-time active complex bandpass filter (figure 1), comprising:

a filter (column 6, line 30) having a transfer function generated using only a plurality of transconductors and capacitors (the filter shown in figure 1 uses only transconductors and capacitors).

As per claim 3, the transfer function in column 9, lines 1-25 describes the recited limitation.

As per claim 4, the recited limitation is shown in figure 2.

As per claim 8, the recited limitation is disclosed in column 6, line 39.

Allowable Subject Matter

4. Claims 9-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 9-14 are allowable because the prior art of record fails to disclose or suggest the inclusion of a first order lowpass filter section which comprises buffers, capacitors, resistors, transconductors configured as recited in claim 9.
